Freebird Rides FAQ

What is Freebird Rides?

Freebird Rides is an app that allows you to earn rewards and cash back every time you use Uber to travel to and from our restaurants.

How does it work?

Simply download the Freebird app and sync it to your Uber account. Instead of requesting rides to our Barrett's restaurants through Uber, request them through the Freebird app to take advantage of our cash back offers. For each ride to any of our locations, you'll receive \$5 off your trip, and every ride from our restaurants will earn you an additional \$5 from Freebird's sponsors. Plus, first time users can use the code BALEH to receive an additional \$5 on your first two rides.

Remember to pay your Barrett's Restaurant bill with the same credit or debit card attached to your Freebird and/or Uber app to redeem these offers. Once your check is closed for the night, your total cash back credits from that visit will be added to your Freebird account within 24-48 hours.

Is Freebird Rides on Android/iPhone?

Yes, it is currently available for both iPhones and Androids and is free to download.

Do I need to use Uber to use Freebird?

Yes. Freebird Rides works in partnership with Uber and you must have an Uber account to sync.

Can I still use my Barrett's Loyalty card?

Yes! This has not replaced our Barrett's Loyalty cards and our guests are welcome to use both their cards and Freebird Rides to score awesome deals.
